Experience

SDE Intern

Riskinsight Consultancy Private Limited (Unison Group) | Hyderabad, Telangana Feb, 2026 - Present

- Architecting dynamic user interfaces using **React.js** and integrating them with **Node.js** middleware to ensure seamless data flow and responsive user experiences across the consultancy's web platforms.
- Developing and optimizing high-performance RESTful APIs using FastAPI, leveraging its asynchronous capabilities to facilitate rapid data retrieval and processing for complex risk-assessment models.data and sessions.
- Managing and querying large-scale relational datasets via Oracle SQL Developer, focusing on writing optimized SQL procedures and ensuring data integrity for critical financial consultancy reports.

Full-Stack Developer Intern

MetaCyrus.tech | New Delhi, Delhi July-Sep, 2024

- Built and deployed MERN web features (**MongoDB, Express, React, Node**) and implemented RESTful APIs integrated with **React** front-end; used Git for version control and **Docker** for containerization.
- Implemented secure user authentication using **JWT** and role-based access control to protect user data and sessions.
- Wrote **Postman** test suites and documented API endpoints, improving handoff quality for front-end integration.

Technical Skills

Languages : C++, JavaScript (ES6+), SQL, HTML5, CSS3

DSA : 600+ problems (LeetCode / Codeforces / GFG) — Focus : Graphs, DP, Trees

Frontend : React.js, Next.js, Tailwind CSS, ShadCN UI

Backend & Databases : Node.js, Express.js, Nest.js, REST APIs, MongoDB, PostgreSQL

Tools & Platforms : Git, GitHub, Docker, Postman(API testing), VS Code, CI/CD basics, Figma, Bash

Education

Bachelor of Technology - Computer Science and Engineering

Guru Gobind Singh Indraprastha University, New Delhi

Expected 2026

8.7 CGPA

Senior Secondary School Certificate

Jamia Millia Islamia, New Delhi

2019 – 2021

91.6%

Projects

DevDesk – Developer Productivity App | Next.js 16, Shadcn UI, JWT, MongoDB | [GitHub](#), [\[Link\]](#)

- Built a full-stack developer productivity platform using **Next.js, TypeScript, and MongoDB** supporting tasks, notes, snippets, and analytics.
- Implemented secure authentication using **JWT access & refresh tokens** with HttpOnly cookies.
- Designed protected routes, **rate limiting, pagination**, and search across multiple resources.
- Integrated **AI-assisted** code improvement using **Gemini APIs**.
- Followed scalable architecture patterns with server/client component separation.

Dev-Event | MongoDB, Next.js 16, Node.js , Aceternity UI | [GitHub](#) , [\[Link\]](#)

- Built a fully responsive event-listing frontend using **Next.js 16**, demonstrating advanced component architecture, **TypeScript** adoption, and optimized routing.
- Integrated efficient state/data management and style pipelines (**ESLint + PostCSS**) for seamless UI/UX, enabling smooth event browsing and filtering across devices.
- Deployed on **Vercel** with performance best practices (automatic font loading, code-splitting) to showcase production-ready frontend skills for modern web apps.
